

PROVINE

With its specific properties, Provine ensures that it is a perfect abrasive for facades and concrete. The angular and sharp mineral grains, in combination with the fine grain size, ensure that Provine can be used universally.

In addition to facade and concrete cleaning, it is also used for graffiti removal and wood and steel blasting work.

CHEMICAL ANALYSIS

SiO₂ 44 - 52 %
CaO 25 - 36 %
Al₂O₃ 7 - 14 %
MgO 5 - 8 %
Fe₂O₃ 1 - 2 %

GRAIN SHAPE

Sharp/Angular

NATURE

Inert

COLOR

Brown/Green

HARDNESS

≈ 7 Mohs

BULK DENSITY

≈ 1,3 kg/dm³

SPECIFIC GRAVITY

≈ 2,6 kg/dm³

GRAIN SIZE

0,1 - 0,35 mm

PACKAGING

- in 25 kg plastic bags on pallet with shrink foil
- In big bags

APPLICATIONS

Provine is suitable for blasting sensitive and surfaces.
Due to its structure and fine grain size, Provine is very suitable for cleaning:

- Masonry
- Sand stone
- Natural stone
- Wood
- Various types of metal
- Removing graffiti.
